Hiring Manager
Vosyn
146 30th St, Etobicoke, Ontario M8W 3C4

Dear hiring manager,

I am writing to express my enthusiastic interest in the Software Developer position at Vosyn company. With a comprehensive background in software engineering, particularly in Node.js, React, and Python, and a proven track record of developing efficient and scalable web applications, I am excited about the opportunity to contribute to your team.

My technical skill set, as outlined in my resume, includes proficiency in various languages and frameworks such as Node JS, Express JS, React JS, Redux, TypeScript, and Python. Additionally, I have extensive experience with cloud-based services like AWS and GCP, and I am well-versed in managing diverse databases including MySQL and MongoDB. My work has consistently aimed at creating responsive, user-friendly interfaces, and developing scalable, data-driven systems.

I hold a degree in Computer Science and Engineering from Shahid Beheshti University and a diploma in Computer Programming and Analysis from George Brown College. My education has been supplemented with relevant courses in web development, advanced programming, and full-stack development, as well as professional development courses like React - The Complete Guide and The Complete Web Development Bootcamp.

In my recent role as a Software Developer at SecondBind Inc., I played a pivotal role in developing an e-commerce web application, enhancing user satisfaction by 36.7%. I also contributed to developing a customer portal and a real-time customer service chat platform, improving the overall user experience and operational efficiency. My experience also includes optimizing SEO and performance, implementing robust security features, and collaborating with teams to create accessible and visually appealing interfaces.

Prior to this, I worked at Pars Data Co., where I developed and maintained a Python-Flask based e-commerce platform, contributing to a significant increase in client sales growth. My role involved optimizing website performance, implementing CI/CD pipelines, and developing a feature flag management system. I also have experience in robust inventory management systems and cloud infrastructure management.

My early career as a Junior Software Developer at Bonyan Nahan Inc. involved developing an online shopping platform using React, integrating WordPress REST API for content management, and implementing effective SEO strategies.

I am eager to bring my expertise in software development to your team, and I am confident that my proactive approach and commitment to excellence would make a valuable addition to your company. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your team.

Sincerely,

Mahshad Eilanlou
